

HOW often one sees a little chap with apparel that seems to

anticipate his maturity. Trousers that reach almost to his shoe tops and a coat, the sleeves of which sadly need abbreviation. There is no need of this.

Our apparel for boys is distinctly boys' apparel in fashion and fabric not only are make, fit and fabrics the best, but we insist upon the best grade of workmanship that will hold its shape to all the ways a live boy subjects them to.

If you are looking for some real good boys' suits, you should visit Harrison's first. Over two thousand boys' suits here ranging in ages from 3 to 18. Prices from

THE MCKINNEY CLOTHING CO.
EVERYBODY KNOWS US

How McKinney Put Big Store Ideas Into a Small Town Business

The conservatives of Durango, Colorado, felt that McKinney, the cash clothier, was wasting money when he opened the first "modern fixture" store in the town.

When he gave away souvenirs and worked other modern advertising plans to attract customers, they were sure that these big store ideas would never go in a little town like Durango.

They prophesied that he would go broke, but instead of that, he built a new home, bought a motor car and enlarged his store.

Brains and Figure Facts—That's All

McKinney backs up his clever and progressive ideas with thorough-going knowledge of his business.

He doesn't have a complicated, expensive system of book-keeping, either. But he *knows* how much he spends and how much he makes every day—he doesn't *guess*.

Does it pay to advertise? Does it pay to carry this or that line of goods? Does it pay to hire an extra clerk?

McKinney can tell you—he's got the answer in dollars and cents.

And he gets it all in a half-hour each day.

The Big Idea That Makes All the Rest Possible

Two forms and a Burroughs Figuring Machine are the bed-rock foundation of McKinney's prosperity.

The totals entered in those forms are a complete record of his business and the basis of a perpetual inventory.

Every one of those totals represents many items added on the Burroughs—the machine that McKinney uses at different times during the day in handling his figure work mechanically. He says that without the Burroughs he couldn't handle the figures—it would take too much time and expense. But with the Burroughs the work is completed in thirty minutes daily.

With a Burroughs any merchant in any line of business can get the real facts that mean profit, and do it the shortest, easiest way.

Consult your telephone book or your banker for the address of the nearest of the 170 offices maintained by the Burroughs Adding Machine Company in the United States and Canada.

"You say your heart is acting up and that you don't sleep well nights, and yet you don't believe coffee hurts you.

"There's a subtle, cumulative drug in coffee—about 2½ grains to the average cup. A little today, a little tomorrow, and so it goes on, irritating the nerves, interfering with digestion and working changes that very often lead to ill health and discomfort.

"Hard to quit coffee you say? Not if you have the pleasant, healthful, pure food-drink—

Postum comes in two forms. The original Postum Cereal, which has to be boiled; and Instant Postum—soluble—made in the cup with hot water, instantly.
